Github

I have been developing some projects to improve my skills in Java EE.
We developed a hospital taking appointment system for the software engineering lesson with Java EE technologies (Maven, JSF, JPA, Spring). This project is in my github account.
We developed final project to graduate from university with Java EE technologies. That project aims higher interaction between student and teacher at online platform. Such as teacher uploads a test document and student replies the questions and takes his/her grade as point. The codes of that project in my github account.
I developed three basic, simple blog project with Java EE technologies. In one of them I used Spring with JSF and in other I used EJB with JSF. And the last one, I used Spring MVC to write the project. Codes of all of them are in my github account.
On the other hand I prepare some projects for the articles in the blog. I publish these projects in my Github account.
In addition I publish in github some projects that I used in the video tutorials.
